## Remote Security Communication Module
SY-RSCM300

SY-RSCM300 is a remote industrial grade secure communications module to access PLC and control system remotely, through the establishment of special S-link Internet networks to ensure data security, support the TCP / IP standard protocol, Profinet, Ethercat and other industrial Ethernet, remote data communications, secure encryption, easy to install, simple to use, cost-effective, stable and reliable, is the patented technology with the latest long-range communications products.

Application：
Typical application of industrial network communication through internet

- Global solution based internet
- Supports a variety of Industrial Ethernet
- Support for download and online diagnosis
- Data security and stability

★ 远程实时在线数据监控
Remote real-time online data monitoring

★ 远程在线编程、调试
Remote online programming, commissioning

★ 远程实时在线视频监控
Remote real-time online video monitoring

Futurelooks remote secure network communication system of industrial

1, The famous SY Group, the headquarters is located in A country, production and operations management at B country, the production base is located in C city, The equipment is imported from D country;

2, As global headquarters located at A country, the need for production of C's production base and number of products, generate real-time progress reports, in order to achieve the normal operation of the global supply chain;

3, Production operations management in the B country, the need for C production base production line in real time to monitor the situation to ensure the normal operation of the production;

4, The equipment manufacturer in D country , the need for a production base in the C city production line equipment, programmable controllers, human machine interfaces for remote debugging and maintenance, to ensure that equipment is working to reduce downtime;

5, Through Futurelooks industrial remote secure remote network communication system, S-link technology help customer to achieve the above-mentioned transfer of industrial data security, The system work normally and stably.

Futurelooks, Inovation for industrial communication
